Learn more about Research & Development Procter & Gamble Europe

Research & Development at P&G is all about developing new technologies that improve the health and wellbeing of our global consumers.

- We invest nearly \$2.0 billion annually on R&D, corresponding to more than 2% of company net sales.
- We have a truly global R&D workforce and in Western Europe we are represented in different countries.
- We hold more than 40,000 active patents, and continue to register patents on a daily basis, which ranks us as one of the most innovative companies in the world.
- We are very active, in collaboration with academia, in the EU Funding Programmes for research and innovation.
- We multiply the power of our internal innovation capability by connecting it to a vast external network of scientists from some of the best institutes and companies around the world.

This is what makes our Research & Development organisation so appealing for curious and innovative young talents!

Research & Development Internship 2013

Procter & Gamble Europe

P&G

INNER

Procter & Gamble's 2013 European Internship Programme in Research & Development

P&G is a globally operating consumer goods company. Our success is driven by the development of superior products and world class innovations.

Through the European Internship Programme, we offer you an exciting work experience in the challenging environment of Research & Development. It's a unique chance to get to know the real working life in industry and can help you decide on your future life career choices.

We are looking for talented, highly motivated students of science and/or engineering disciplines who are in their penultimate year of study, (first superior degree or PhD), who have strong technical skills and a good command of the English language.

If you're looking for scientific challenges and a chance to be innovative, P&G is the right place for you!

The Programme...

P&G's R&D European Internship programme is run in our Innovation Centres located in Germany, the UK, Belgium and Italy. We offer students the opportunity to work on research projects for 10-12 weeks mainly in the summer break.

We also offer internships/placements for longer periods (up to 1 year) and at different times of the year. On top of a great learning experience, participants will also receive an attractive remuneration package.

During your internship you will...

- be making a difference on a product that you, your friends or your family may use every day.
- be responsible for your own project as part of a European project team from day one.
- have a unique opportunity to put your technical skills to work on an intellectually challenging problem.
- improve your team-working and managerial skills through practical experience and interactive training courses.
- develop collaboration skills with colleagues of different nationalities and cultural backgrounds, based at various locations.
- understand your strengths and development areas through feedback talks and gain guidance for your future professional career.
- experience the real-life working environment in a leading international company.

It's a unique experience for you.....do not miss it!

Are you ready to challenge yourself like never before?
